DETAILED ACTION

1. Receipt is acknowledged of the Amendment received on 22 March 2004.

Allowable Subject Matter

2. Claims 1-11, 13-17, and 41-56 are allowed.
3. The following is an examiner's statement of reasons for allowance: The reasons for allowance have been discussed in the previous Office Action. Re claims 1-3, 8, 9, 41-43, 48, and 49, the Examiner finds the Applicants' arguments persuasive, as the Applicant states that it is advantageous to minimize the length of conductor among the interconnected elements, thus making it important that the switch be disposed proximate the terminals, to minimize the pickup of spurious signals, which can interfere with the operation of the memory card. Accordingly, such modification of the location of the switch to be on a surface of a card proximate the terminals is a non-obvious limitation (page 13, Applicants reply of 22 March 2004). Further, re claims 10 and 50, the Examiner notes that the prior art does not teach a control circuit disposed within the card body ...responsive to a read status instruction signal from the external device to supply the status signal to the terminals (p. 14, Applicants' reply of 11 August 2003).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
